

1. If 'cannot execute' error occurs occurs in KeTTeX (capitan in particular):

- (1) Press 'Cancel'.
- (2) Open System preference > Security and Privacy.
- (3) Press 'Execute as it is'.

2. Install KeTCindy

- Use `ketcindysettings.cdy`
- if an error occurs in 'Update', carry out steps of **1**.

3. Test run of KeTCindy

- (1) Once Quit Cinderella and Double-click 'testrun.cdy'.
Then a frame in white appear on the screen.
- (2) Press "Figure" button at the top left, then the final PDF output is displayed.

Rem) To close the window of Terminal when the process exits :

- Start **Terminal**.

Preferences > Shell > "Colse if the shell exited clearly"

Rem) It will be better to delete installer folder "ketcindy(-master)" .

4. Set Texworks if necessary. For example, in case of KeTTeX,

- Downloadable from <https://github.com/TeXworks/teXworks/releases/>.
- Launch TeXworks,
and choose Edit > Preference > Typeset.
- Push upper + and add
/Applications/kettex/texlive/bin/x86_64-darwin
- Select Xelatex or pdflatex.

5. Install Xcode if you use gcc for drawings of surface.

Rem) f you want to use only gcc, execute on Terminal:

```
sudo xcode-select --install
```

6. Others

- Terminal command to allow to execute all aplications (Sierra or later)
`sudo spctl --master-disable`
