

install of KeTCindy Modified : Dec. 10th 2018

1) Install Cinderella, R and Maxima.

- <https://beta.cinderella.de> (Cinderella)
- <https://cran.r-project.org> (R)
- <https://sourceforge.net/projects/maxima> (Maxima)

2) Install TeX if any TeX has not been installed.

(1) TeXLive is recommended.

* Files necessary for KeTCindy have been implemented (2018 or later).

- i) texmf-dist/scripts/ketcindy ketlib, setketcindy, ketoutset, etc.
- ii) texmf-dist/tex/latex/ketcindy Style files for ketcindy
- iii) texmf-dist/doc/support/ketcindy Manuals and source files

(2) kettex is a light-weight TeXLive.

* Download from

Mac (kettex.dmg)

<https://www.dropbox.com/s/dc4inuk06t07g26/kettex.dmg?dl=0>

Windows (kettex.exe)

<https://www.dropbox.com/s/fthw4btjqqs33tc/kettex.exe?dl=0>

Linux (kettex.tar.xz)

<https://www.dropbox.com/s/vg8p07832e9hzlk/KeTTeX-linux-20171022.tar.xz?dl=0>

* Move kettex generated by double clicking as follows.

Mac /Applications, Windows C:\

(3) In case of other TeX, see Readme in ketcindy of 3)

3) Install KeTCdindy

(1) Download ketcindy from CTAN <https://ctan.org>

“ketcindy” > Package ketcindy > download

* The latest version can be download from Repository.

<https://github.com/ketpic/ketcindy>

* Download ketcindy-master as follows

Clone or download > (SSH) > Download ZIP

(2) Install KeTCindy according to Readme in forMac/forWindow/forLinux.
